MOHAMMED HAMI ASIF KHATRI

Dubai, AE / khatrihami09@gmail.com / +971 56 942 9518

Summary

Second year Computer Science student at University of Wollongong Dubai with a strong foundation in programming and problem-solving. Looking to apply and grow technical and analytical skills in a real- world professional environment, in-particular software development and Artificial Intelligence

Academic Projects

- Internly - Internship Management Website

Lead the development of an internship management website with a four-member group. Allowing students to register, log in, and apply for internships, while also allowing companies to create and manage internship listings and review applications.

- Stratify - Strategic Planning System (Phoenix Consultancy Project)

Collaborated with a five-member group to design a strategic planning and performance management system for a hypothetical automotive company switching to electric vehicles. Conducted PESTEL analysis, system modeling (UML) and implemented Agile methodology to deliver features like remote production oversight, energy management, and market trend analysis.
